CAREER OBJECTIVE

As a skilled Data Engineer with over **4.5 years** of hands-on experience in developing and optimizing data solutions on Google Cloud Platform (GCP), I bring understanding of cloud-based data architecture, ETL processes, and big data technologies. My expertise lies in designing and implementing scalable data pipelines, automating workflows, and ensuring data integrity across various environments. Proficient in tools such as BigQuery, Dataflow, and Cloud Composer, I am committed to delivering efficient data solutions that drive business insights and innovation.

SUMMARY

- Developed a data quality assurance policy leading to a 20% decrease in data errors.
- Adept in managing large-scale data platforms using comprehensive suite of languages including SQL, and Python.
- Driven by designing powerful systems, enhancing user experiences, and looking forward to contributing value in a dynamic, cutting-edge technology environment.
- Proficient in Programming Languages: Adept in GCP, Python, SQL, BIGQUERY, GCP STORAGES, COMPOSER, AIRFLOW, OS .
- Strong Problem-Solving Skills: Ability to analyze complex requirements, design efficient solutions, and debug challenging issues in a fast-paced environment.
- Collaborative Team Player: Excellent communication skills with a proven track record of working effectively in cross-functional teams.

WORK EXPERIRNCE

Worked for **Cognizant** as a **Software Engineer** from **Feb 2021 - Till Date.**

Roles and Respnsibilities:

- Training on SQL, Python & BigData Tools.
- Hands on Experience in Cloud Technologies And Bigdata tools.
- Shadowed Professionals in a project.
- Worked closely with data Professionals to understand data requirements and objectives and to deliver quality data solutions.
- Involvement in RND and POC's (proof of concept) for Project requirements.
- Utilizing programming and scripting skills, including SQL, PL/SQL, Python to solve data-related problems and optimize processes.
- Hands on Experience in Big-Data Processing & Analytics in Google Bigquery.
- Experience with Cloud Development in GCP (Google Cloud Platform).
- Experience with open source Big-Data Tool and Technologies.
- Taking responsibility to understand customer requirement and provide Solution with positive approach.
- Developed and maintained technical documentation, ensuring clarity and accuracy for future reference.
- Engaged in continuous learning and professional development to stay updated with the latest industry trends and technologies.

TECHNICAL SKILLS……

- **Programming Languages:** Python, SQL,
- **Databases:** MySQL, Oracle, Microsoft SQL Server
- **Cloud Platforms:** Google Cloud Platform (GCP)
- **Operating Systems:** Linux, Windows.

FUNCTIONAL SKILLS……

Quick Learner, Swift Adaption to AI Tools, Team Work, Presentational, Interactive Head

EDUCATION……

Bachelor of Engineering (Biomedical Engineering) , 2017

PROJECT DETAILS……

Project 1
Role: Data Engineer
Environment: Google Cloud Platform (GCP)
Tools: BigQuery, Power BI, ELT Processes, SQL

Key Achievements:

1. Understanding and Analyzing Reports:

- Took ownership of understanding the requirements of assigned reports by collaborating directly with Report Owners.
- Developed and documented technical specifications to guide the implementation, ensuring a clear understanding of data sources, transformations, and expected results
- Ensured that the technical implementation aligned perfectly with business needs for accurate and timely reporting.

2. ETL/ELT Development:

- Extracted data from multiple source tables, maintaining the highest standards of data integrity and accuracy.
- Loaded the combined data into a centralized consumption table, creating a solid foundation for further processing.
- Transformed the data using complex calculations to create views that met the specific needs of the reports.

3. Stored Procedure Creation:

- Designed and implemented stored procedures in BigQuery to handle complex joins and processing calculations across multiple tables.
- Successfully generated optimized consumption tables that served as the backbone for all subsequent reporting and analysis.

4. View Creation for Visualization:

- Created and provided the necessary views to the visualization team, enabling them to generate the expected reports efficiently. ○ Worked closely with the team to ensure that the views fully supported their visualization requirements.

5. Performance Optimization:

- Optimized the performance of data processing tasks by shifting the computational load from Power BI to BigQuery.
- Reengineered existing calculations within BigQuery, leading to faster query execution and significantly improved processing times.

Project 2
Role: Data Engineer
Environment: Google Cloud Platform (GCP)
Tools: Google Cloud Storage (GCS), Cloud Functions, Apache Spark, Apache Airflow, BigQuery, Tableau

Key Achievements:

1. Data Management in Google Cloud Storage (GCS):

- Managed and organized data across various layers in Google Cloud Storage, ensuring efficient storage, retrieval, and access.
- Set up and configured triggers on GCS using Cloud Functions to automate workflows and data processing tasks, enhancing overall system efficiency.

2. ETL Transformation with Apache Spark:

- Developed and triggered Spark jobs to perform ETL transformations on data within the workflow.
- Ensured that the data was accurately processed, cleaned, and transformed according to business requirements, resulting in high-quality datasets for further analysis.

3. Orchestration with Apache Ae Airflow:

- Managed and monitored Airflow DAGs (Directed Acyclic Graphs) for orchestrating complex data workflows
- Ensured the smooth execution of tasks within the workflow, troubleshooting and optimizing DAGs as necessary to maintain optimal performance and reliability.

4. Data Management in BigQuery:

- Handled the management and organization of data within BigQuery datasets, ensuring that the data was properly structured and optimized for analytical queries.
- Conducted performance tuning and query optimization to enable fast and efficient access to data for analysis.

5. Collaboration with Tableau Team:

- Worked closely with the Tableau team to understand their requirements for data visualization.
- Created and provided tailored views in BigQuery that met the specific needs of the Tableau team, facilitating accurate and insightful visualizations.

PERSONAL DETAILS……

Date of Birth	:	09/06/1995
Gender	:	Female
Marital Status	:	Married
Nationality	:	Indian
Languages Known	:	English, Hindi, Marathi

DECLARATION……

I hereby declare that all above-mentioned information is in accordance with fact or truth up to my knowledge andI bear the responsibilities for the correctness of the above-mentioned particulars.

Date:
Place: Pune **Komal Bhoyar**
