Amit Kumar Singh
Email:amits3144@gmail.com
Mob: 9821829151

PROFESSIONAL SUMMARY

- **Having 8+ years** of IT experience in Analysis, Design, Development and Implementation of Enterprise Applications in the Client/Server environment as a Java Developer using Java/J2ee in Client- Server, 3-tier and n-tier applications.
- Experience in all aspects of Software Development Life Cycle (SDLC) including requirements analysis, design specifications, code development, code integration, testing, and deployment using Object Oriented Analysis and Design with Core Java/J2EE and APIs.
- Extensive knowledge & good experience on Java Application Development, Distributed Applications, Object Oriented Applications, and Internet/Intranet based Database Applications.
- Exposure to modern software practices like CI/CD.
- Experience in architecting multiple Highly Scalable/Available Fault Tolerant applications setup in an AGILE/SCRUM environment.
- Strong working experience in server-side technologies Spring boot, Spring (Core, MVC, DAO, Security, REST, boot, cloud) , Hibernate, Jpa, RESTful.
- Experience with API security technologies JWT.
- Strong experience in mircoservice development using Spring Boot and Spring Cloud with Netflix Libraries.
- Good working experience with various micro service design patterns like Service, Circuit Breaker, API Gateway, Event-Driven Architecture, and Aggregator Pattern
- Well experienced in Core Java – asynchronous programming, multithreading, collections and a few design patterns.
- Experience in deploying applications on cloud platforms Azure.
- Experience in CICD Pipeline using Jenkins and Azure Code Build.
- Experience in Azure Migration Work.
- Experience with container orchestration tools Docker and Kubernetes.
- Strong working experience in UI Technology stack JavaScript and JavaScript Frameworks, JQuery, HTML5, CSS3.
- Strong experience in unit testing technologies / tools (UI and Server side) JUnit, Mockito, SonarCube.
- Knowledgeable with RDBMS concepts like writing SQL Queries. Working experience of Relational DBMS like MySQL, Oracle SQL PL/SQL, SQL Server (MS SQL).
- Experience with NoSQL databases like Mongo
- Extensive experience using Java technologies: Core Java, Multithreading, Design patterns, Collections, JDBC, JSP, JMS- (Active MQ).
- Experience with messaging systems like Kafka, Kafka event sourcing.
- Experience using Hibernate, Spring Data JPA or other Object Relational Mapping frameworks.
- Experience in developing Oracle database schemas, tables, procedures and permissions.
- Implemented a Continuous Delivery pipeline with Dockers, Jenkins through GitHub.
- Good experience with log tracking and tracking tools like Splunk, Kibana.
- Hands-on development of Web services REST based implementations.

Education
B.E.

TECHNICAL SKILLS

Programming Languages	Java, JavaScript, SQL
Java EE Technologies	JSP, Servlets, JDBC, JDBC, JMS, JSTL, MVC

Server-Side Frameworks	Spring boot , Spring cloud, Spring, Hibernate 4.x, RESTful services with Spring MVC , Junit, Mockito, Spring Test Framework, Log4j,Logback

Messaging Servers	ActiveMQ, Kafka
Message Oriented Middleware	JMS, Kafka
Web Technologies	JavaScript, HTML
Web/Application Servers	Oracle WebLogic Application Server, Apache Tomcat Webserver, JBoss Application Server
Databases	MySQL, Oracle, MS SQL Server, Cassandra, PL/SQL, MongoDB.
Cloud Platforms	Azure
Web Services	Restful
Source Control Tools	SVN, Stash-Git, CICD
Testing	Junit, Mockito, Power Mockito
Build and Performance Managing Tools	Maven, Gradle, Jenkins, JIRA

PROFESSIONAL EXPERIENCE

Worked For TECH MAHINDRA From 03 March 2021 to 26 December 2025.

Worked For QUESS CORP From 14 May 2020 to 11 December 2020

Worked For BLUGATE from 09 October to 06 January 2020

Worked for Anabatic Technologies From 16 January 2018 to 13 September 2019

Worked For Invictus Technology Solutions From 01 August 2016 to 12 January 2018

CONNECTED CAR| AT&T(Telecom domain)
JAN, 2022 | Till Date
Java Developer

Responsibilities:

- Involved in PI Planning, Sprint Plan, Sprint Refinement, Sprint Retrospective, Collaboration, Business requirements analysis, story implementation, code reviews, static code analysis and unit test cases.
- Used Postman with JSON to test the request and response of the application.
- Converted workflow module into micro services and integrated to platform applications
- Designed and developed the REST based Microservices using the Spring Boot, Spring Data with JPA.
- Created RESTful APIs and microservices using Java to facilitate data exchange.
- Integrated various number of downstream API.
- Developed authentication and authorization for micro services APIs using JWT.
- Implemented Java code with Contivo Map.
- Developed CICD pipelines using Azure environment and regular legacy platforms.
- Designed reporting solution to find and validate the exceptional data.

- Integrated Veracode, Sonarqube plug-ins to IDEs and enforcing team to run the scans before commit the code.
- Used Postman with JSON to test the request and response of the new APIs.
- Worked on XPDL and their Implementations.
- Created various number boards , design documents and instruction documents.
- Helping other team leads on various requests.
- Conducting sprint integration sessions with team to address any open issues while development.
- Working with System team and CICD team to automate the build and deployment.

  Addressed critical issues related to data validation and generating reports.
- Reviewed the code for ensuring adherence to Java coding standards.
- Responsible in testing the classes and methods using Junit test case for unit testing of application and Log4j to capture the logs.

Environment: Java 8,Spring Boot, Microservices, Maven, Spring Cloud, Spring, Microservices, Cassandra, REST API, Log4J, Code Cloud, ecoPipeline, Contivo, XPDL, Docker, Kubernetes, Kafka.

CCTNS |HP Police **March, 2021 | DEC, 2021**

Java Developer

Responsibilities:

- Responsible for writing J2EE compliant Java code for application development effort which involved working with JSP, Spring MVC etc.
- Designed and developed the application using Agile approaches, Including Test-Driven Development (TDD) and Scrum.
- Implemented Java Code in Spring MVC as per the requirements.
- Developed the view-controller components using JSPs, JavaScript.
- Design and Development of Objects using Object Oriented Design in Java.
- Integrated spring (Dependency Injection) among different layers of an application.
- Developed the application using JavaScript.
- Extensively used Maven to build the application and deploy on Embedded Tomcat Server.
- Configured session timeout with Spring Boot in server side and implemented auto logout Functionality.
- Using spring security framework for user level authentication with REST API for Service Layer Development.
- Expertise on entire Intranet and Internet applications using Web and Application servers like TOMCAT.
- Used spring framework for the MVC implementation with spring for DI and Hibernate as ORM tool for database communication.
- Extensively used Maven to build the application and deploy on Embedded Tomcat Server.
- Maintained source code in GIT Repository.
- Used Log4j for logging to trace the application log messages which is used for debugging.
- Designed various tables required for the project in Oracle database.
- Reviewed the code for ensuring adherence to Java coding standards.
- Used JIRA for writing user stories and raising defects in a defined sprint.

Environment: Java 1.8, JSP, JSON, Spring IOC, Spring MVC, Spring ORM, Agile, Hibernate, GIT, Oracle, Tomcat, Log4j, GIT, JIRA, Oracle, Windows.

Transaction Processing Engine | Anabatic technologies India Pvt Ltd

Oct, 2018 | Aug, 2019

Java Developer

Responsibilities:

- Followed Agile Software Development Methodology and Test-Driven Development (TDD) to build the application iteratively and incrementally.
- Implemented Spring Boot application with Hibernate.
- Participated actively in unit testing.
- Used Core Java concepts collections.
- Used JSON to send request to the server to check the functionality.
- Deployed Spring Boot based Microservices Docker.
- Designed and developed Rest Services using Java, spring, Spring Boot, RESTful, JPA, Hibernate.
- Involved in integrating spring with Hibernate and delegated the persistence operations using Hibernate Template.
- Spring Boot Micro services were developed with microservice architecture using REST and Apache Kafka.
- Developed functional components using different concepts of core java like Multi-threading and Collections.
- Built Microservices using spring boot with continuous deployment and continuous integration using Jenkins.

Environment: Java, J2EE, Core Java, Spring Boot, Hibernate, Eclipse, Tomcat, Web Services, Maven, spring boot, PostgreSql, Kafka, Windows.

Customer Data Hub | Anabatic Technologies India Pvt Ltd
Jan , 2018 | Sep, 2018

Java Developer

Responsibilities:

- Involved in complete SDLC management – Requirements gathering, Design, Analysis, Development and Testing.
- Implementing Model View Controller (MVC) pattern.
- Performed validation for client side as well as server side.
- Implemented Controller Classes.
- Used JPA mapping techniques such as One to One, many to One and Many to Many mappings to represent relation between various entities in the project.
- Worked Oracle database to create databases of student and faculty login information and their desired areas of study.
- Worked on Eclipse as IDE tools to build up applications.
- Implemented Commands and their implementations.
- Written Spring DAO's and their implementation.
- Provided weekly status reports to the manager with the latest information of all ongoing activities.
- Followed the Java coding standards for scalability, reusability and ease of maintenance.
- Injected Spring DAO's into Spring Services.

EX- Student Portal **Oct , 2016 | Dec, 2017 Java Java Developer**

Responsibilities:

- Implemented JSP's as per the Requirement.
- Implemented Commands and their Validations.
- Implemented Controller Classes.
- Written Spring DAOs and their implementations With Hibernate.
- Written Hibernate Mappings.
- Written Spring Configuration file.
- Involved in complete SDLC management – Requirements gathering, Design, Analysis, Development and Testing
- **Environment:** Java, J2EE, Core Java, Spring MVC, Hibernate, Eclipse, Tomcat, Maven, spring IOC, MySQL, Windows, Log4j, GIT.
